TSM 098 Linear Equations and Linear Systems Test - Practice 2

Version 202610122020.11 | Name: _____

Complete and show all work on a separate sheet of paper. Record final answers on the answer sheet. Give exact answers and simplify completely. Check numerical answers in the original equations. Equations may have no solution or all real numbers; systems may have no solution or infinitely many solutions.

Answer key follows the answer sheet. Attempt the test before checking it.

1. Solve the system and check in both equations.

$$y = 2x - 4$$
$$x + y = 5$$

2. Solve and check.

$$3(2x - 3) - (x + 4) = 2x - 8$$

3. Solve the system and check in both equations.

$$2x + 3y = 12$$
$$3x + 5y = 19$$

4. Solve and state the complete solution set.

$$4(x - 3) + 14 = 2(2x + 1)$$

5. Solve and check.

$$\frac{x+3}{3} + \frac{x-1}{4} = \frac{23}{12}$$

TSM 098 Linear Equations and Linear Systems Test | Practice 2

Version 202610122020.11 | Name: _____

Question 1

Solution $(3,\ 2)$

20 pts

Question 2

Solution $x = \frac{5}{3}$

20 pts

Question 3

Solution $(3,\ 2)$

20 pts

Question 4

Solution set All real numbers; both sides reduce to 4x + 2.

20 pts

Question 5

Solution $x = 2$
