TSM 099 Graphing Test - Practice 2

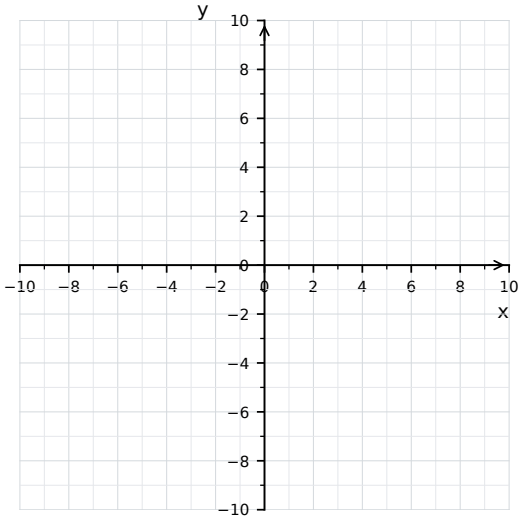

Version 202610122020.29 | Name: _____

Complete and show all work on a separate sheet of paper. Record final answers on the answer sheet. Give exact answers and simplify completely.

Answer key follows the answer sheet. Attempt the test before checking it.

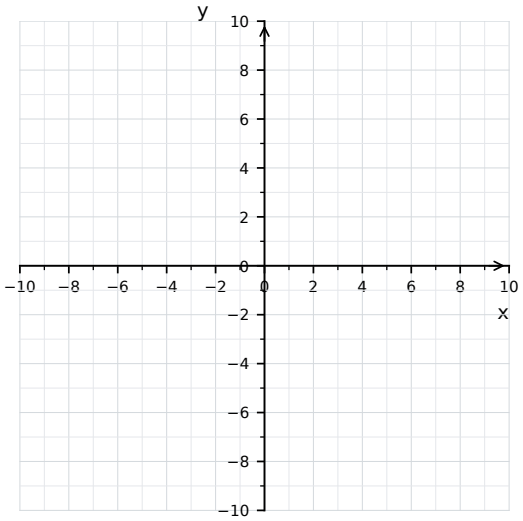

1. Find both intercepts and graph through them on the grid.

$3x + 2y = 12$

2. Graph the line on the grid. Mark at least two points.

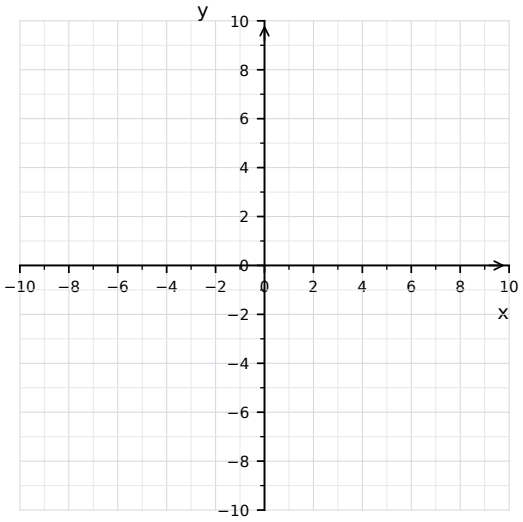

$y = \frac{2x}{3} - 1$

3. Solve by graphing both lines on this grid. Algebra alone is insufficient.

$y = 2x - 3$

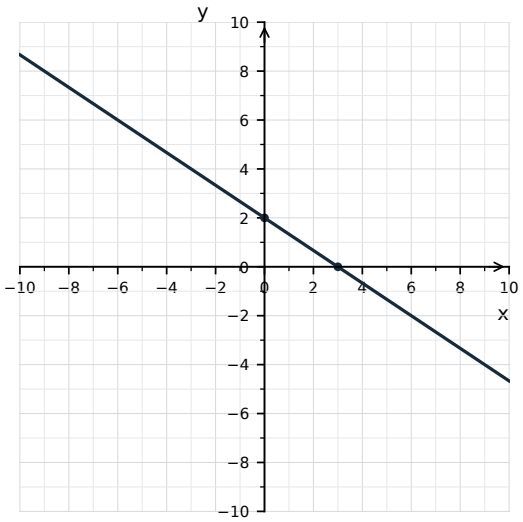

$y = 7 - 3x$

4. Find the slope-intercept equation through the two points. Show the slope formula and determination of the intercept.

$(1, \frac{1}{3});\ (4, \frac{4}{3})$

5. Write the equation of the displayed line in slope-intercept form.
